

PASQUALE CONTE

SOFTWARE ENGINEER - FRONTEND DEVELOPER

 [contepas.github.io](https://github.com/contepas)  linkedin.com/in/pasqualeconte  github.com/contepas
 conte.pas@gmail.com  +31(0)657247128  Delft, Nederland

LATEST RELEVANT EXPERIENCES

FrontEnd Engineer

Scotch & Soda

 February 2022 - 2023

 Hoofddorp, Nederland

- Worked on the transition of the Design System Components Library, from a custom-made system to develop components in isolation to Storybook, to streamline UI development processes, reducing development and maintenance stress.
- Enhanced UI components by migrating from Vue 2 to Vue 3, introducing TypeScript for improved developer experience (DX).
- Coached the FrontEnd team to enhance their Vue, JavaScript(TypeScript), and general software engineering skills, promoting a culture of continuous learning.
- Main technologies: JavaScript (TypeScript), Vue.js, Storybook.

Software Engineer

Nurtio

 January 2021 - 2022

 Delft, Nederland

- Developed a Progressive Web Application (PWA) for visualizing data from Nurtio soil sensors, providing users with an intuitive, user-friendly interface to monitor water levels, light, and temperature through dynamic, real-time graphs. The app also allows users to set alarms and automate maintenance notifications.
- Led the development of an internal Web Application designed to provide comprehensive access to sensor data while offering features to manage both company and client needs.
- Main technologies: JavaScript (TypeScript), Ionic Vue, Vuetify 2, Vue 3, Vue 2, Storybook, GraphQL, Sentry.

Web Developer

Vaartland

 August 2019 - 2021

 Bergambacht, Nederland

- Worked on the migration of Vaartland main web application from a monolithic Symfony app to a standalone Vue and Nuxt-based Front-End. This involved rewriting all UI components, from base elements like buttons and input fields to complex forms, while also enhancing both the user experience (UX) and user interface (UI).
- Worked on a new FrontEnd for an internal application, utilized for various company services, ranging from employee management to 360-degree car photography.
- Established a comprehensive Components Design System Library made with Storybook, facilitating consistent and efficient FrontEnd development across projects.
- Contributed to the development of a custom-made CMS for the main website, optimizing content management workflows.
- Main technologies: JavaScript - Vue 2 - RxJS - Nuxt - PHP - Docker.

FAVOURITE TECH

JavaScript (TypeScript) - Vue - Go

Neovim (Lua) - Unity (C#)

LANGUAGES

Italian

English

EDUCATION

University of Computer Science

University of Molise

 Sept 2011 - 2014

High School of Programming

Technical Institute L.Pilla

 Sept 2002 - 2007

MORE ABOUT ME

- Software developer since age 13.
- +15 years professional experience in web development, with focus on the FrontEnd for +5 years.
- Creative, friendly and open, with a passion for learning and knowledge sharing.
- Committed to crafting lightweight, scalable systems that are easy to use and maintain; with an enjoyable User Interface.

HOBBIES

- I like to play Tennis, chess, board games, and video games like World of Warcraft, Zelda, Crash Bandicoot, Super Mario, Hollow Knight, and many more; my first game "Alex Kidd in the Miracle World".
- I'm a Video Game Developer.
- I'm a musician, I played many instruments over the years, and I spent the most of my time with guitar, piano and accordion; and I have a special love for singing.
